

Journal Reflection

Think about your results from the Pipeline AZ Career Assessment to answer the following questions.

1. What component of your results resonates most with you?
2. What felt off base? Did any component of the results feel like they did not match you?

3. Of the careers the survey results connected you to, which one (or more) did you choose to explore in more depth?

4. List three things you learned about the career you chose to explore.
